PROFILE

I am a technically skilled professional with expertise in Python, SQL, system troubleshooting, and backend database management. Passionate about continuous learning and innovation, I thrive in fast-paced environments, leveraging my problem-solving abilities to optimize systems and drive operational efficiency. Committed to growth and collaboration, I aim to contribute meaningfully to organizational success while advancing my skills in dynamic and evolving fields.

WORK EXPERIENCE

NALCO Ltd.   2024 (June - July)
Full-Stack Developer Intern

- Developed an e-commerce platform using Django and SQL.
- Optimized database performance and handled backend management
- Collaborated with cross-functional teams to ensure seamless integration and deployment of the platform.

PROJECTS

E-commerce Website

- Managed backend reliability using Django and SQL. Focused on debugging and optimizing performance.

Expense Tracker Application

- Ensured database integrity and error handling for financial records using Python and CSV.
